Q4	(a)	**1st M1** attempting to integrate **at least one** part (at least one $x^n \rightarrow x^{n+1}$) (ignore limits) **1st A1 Correct integration.** Limits not needed. **2nd M1** dependent on the previous M being awarded. Adding the two answers together, putting equal to 1 and have the correct limits. **2nd A1** cso	
	(b)	**1st M1** Att to integrate $\frac{1}{9}\left(t^2 - 2t + 2\right)$ (at least one $x^n \rightarrow x^{n+1}$). Ignore limits for method mark **1st A1** $\frac{1}{9}\left(\frac{x^3}{3} - x^2 + 2x\right)$ allow use of *t*. Must have used/implied use of limit of 0. This must be on its own without anything else added **2nd M1** attempting to find $\int_3^x 3k + \ldots$ (must get $3kt$ or $3kx$) and they must use the correct limits and add $\int_0^3 \frac{1}{9}\left(t^2 - 2t + 2\right)$ or $\frac{2}{3}$ or use + C and use F(4) = 1 **2nd A1** $\frac{x}{3} - \frac{1}{3}$ must be correct **1st B1** middle pair followed through from their answers. condone them using < or $\leq$ incorrectly they do not need to match up **2nd B1** end pairs. condone them using < or $\leq$. They do not need to match up NB if they show no working and just write down the distribution. If it is correct they get full marks. If it is incorrect then they cannot get marks for any incorrect part. So if $0<x\leq 3$ is correct they can get M1 A1 otherwise M0 A0. If $3<x\leq 4$ is correct they can get M1 A1 otherwise M0 A0. you cannot award B1ft if they show no working unless the middle parts are correct.	
	(c)	**1st M1** attempting to use integral of *x* f(*x*) on one part **1st A1** Correct Integration for both parts added together. Ignore limits. **2nd A1** cao or awrt 2.42

You may need to check their values for their **correct** equation **NB these last two marks are B1 B1 on ePEN but mark as M1 A1** **2nd A1** for conclusion but only award if it follows from their numbers. Dependent on previous A mark being awarded **SC** using calculators **M1** for sign of a suitable equation **M1 A1** for awrt 2.66 provided equation is correct **A1** correct comment
